EXPERIENCE

Copeland

Quezon City, Metro Manila

Demand Analyst I

Oct 2025 – Present

- Managed multiple top customers data to deliver insights on each customer's demand forecast in terms of variance, accuracy, and shipment-to-customer fulfillment.
- Developed a comprehensive report that measures the company's top customers' forecasts against internal forecast and shipment reports, that is used to aid executive-level decisions.
- Co-authored multiple reports and automations that resulted in a reduction of 25% workload for each report's stakeholders.

Toyota Motor Philippines

Makati City, Metro Manila

Demand and Supply Planning Specialist

Sep 2024 – Aug 2025

- Managed the supply and demand forecasting for six vehicle models, including three key models that are critical to the company's market share in the rapidly expanding xEV segment in the Philippines.
- Monitored daily model performance to align ordering composition with real-time market demand and trends.
- Developed data-driven forecasts by analyzing historical sales data, model segment trends, and applying industry-standard variables such as SAAR and CAMPI competitor reports.
- Collaborated cross-functionally with Product Planning, Vehicle Logistics, and Marketing Departments to ensure seamless integration of new model launches and model improvements without disrupting the ongoing sales momentum of the existing models.
- Validated interdepartmental data inputs used in forecasting models, ensuring accuracy, consistency, and adherence to standardized logic.
- Supports the company's 3-year Philippine Automotive Market study by contributing long-term model forecasts beyond direct responsibilities.
- Served as a core team member responsible for forecasting both internal and competitor xEV models, driving strategic initiatives aimed at maximizing company market share.

Intellismart Technologies Inc.

Quezon City, Metro Manila

Administrative Assistant

Jul – Aug 2023

- Coordinated with multiple departments in ensuring quality completion of at most 25 projects within 16 days.
- Ensured quality and quantity control of stocks of upwards of 500 items in inventory to be used and deployed for projects.
- Processed and helped filing budget propositions for the deployment of a technical team that reduced unnecessary expenses by up to 20%.

EDUCATION

University of the Philippines – Los Baños

BS Applied Mathematics – 2024

Awards:

- Graduated with Latin Honours – **Cum Laude**

Relevant Coursework:

- Linear, Non-linear, Integer, Dynamic, and Metaheuristics Programming; Mathematical Modeling for Operational Research; Numerical Analysis – Operational Research
- Mathematical Modeling and Metaheuristics Programming using Python; Numerical Analysis for MATLAB – Coding

CERTIFICATIONS

July 2024

- **Certified** for a Lean Six Sigma – White Belt from Six Sigma PH
- **Certified** for “Control Charts Made Simple for Service Industry (Using Minitab)” from Six Sigma PH.

December 2023

- **Participant** of a seminar titled: “Creating Value Through Strategic Management in the Banking Sector”

SKILLS

Technical Skills

- Demand and Supply Planning, Project Scheduling and Management, Gemba Kaizen, Forecasting, Resource and Budget Management, Scheduling, Production Planning, Mathematical Modeling, Data Analysis, SQL, Python, MATLAB, Minitab, Power BI, Anaplan, Office360, Google Suite

Language

- English and Filipino
